

# 1. Overview

This folder contains the raw data and technical documentation for the bibliometric analysis of the 82 primary studies included in this SLR. To ensure maximum transparency, the authors have provided the verified Excel datasets and metadata files used to generate the study's visualizations (Figures 2–7).

## 2. File Descriptions

- **Bibliometric\_Data\_Pipeline.pdf:** Technical methodology detailing the hybrid AI-Python-Excel workflow used for thematic and structural auditing.
- **Bibliometric\_Analysis\_Master\_Data.xlsx:** A multi-sheet workbook containing the frequency tables for keywords, publisher distributions, journal counts, and JCR quartile rankings.
- **Final\_82\_Papers\_Metadata.csv:** The master bibliographic export containing the verified metadata for all included primary studies.
