

1. Content Overview

This folder contains the raw data extracted from the **82 primary studies** included in this SLR. The data is organized into five separate tables, each addressing a specific Research Question (RQ) defined in the study protocol.

2. Document Mapping

- **Table_RQ1_Data_Preprocessing.pdf:** Analysis of data transformation, representation, and feature engineering.
- **Table_RQ2_Model_Taxonomy.pdf:** Categorization of ML/DL architectures and detection paradigms.
- **Table_RQ3_Dataset_Characteristics.pdf:** Detailed breakdown of synthetic and real-world data sources.
- **Table_RQ4_Performance_Metrics.pdf:** Comparative effectiveness using standard and operational metrics.
- **Table_RQ5_XAI_and_Robustness.pdf:** Evaluation of explainability techniques and adversarial defense.
